

Workshop on Wearable and Implantable Antennas and Propagation

16 March 2017, ECIT Institute, Queens Road, Belfast, UK
9:30-16:00

Organised By: Centre for Wireless Innovation, ECIT Institute, Queen's University, Belfast and the Antenna & High Frequency Research Centre, Dublin Institute of Technology.

Chairs: Gareth Conway (ECIT) and Max Ammann (DIT)

Supported by: Science Foundation Ireland (SFI), IEEE Control and Communication (Ireland) Joint Chapter, IEEE Antennas & Propagation Society Student Branch Chapter Queen's University, Belfast.

The workshop will focus on the latest developments in wearable and implantable research, with Invited Talks, Poster Sessions and a Lab Tour: Wearable & Implantable Antenna Experimental Measurements.

Invited talks from Chiba University, Dublin Institute of Technology, University of Ulster, Letterkenny Institute of Technology, Queens University Belfast.

Keynote Speakers:

Professor Koichi Ito, Life Fellow IEEE, Professor Emeritus and Visiting Professor at the Center for Frontier Medical Engineering, Chiba University.

Professor Yang Hao, Fellow IEEE, Professor in Antennas and Electromagnetics at Queen Mary, University of London

If you would like to present your research at the 'Poster Presentation Session' email requests with a brief description of the research to Dr. Gareth Conway email: g.conway@qub.ac.uk
